Aloha:

Colan is a wonderful person and a very talented craftsman. It was such a pleasure having him and his crew help us remodel and redesign our house. We spent nine months working together -- a time of demolition, incubation, imagination, inspiration, renovation. It was actually fun having them show up every morning -- the day would then proceed with nail guns and banging and sawing and lots of consultations and creative thinking. The end result is that I LOVE my house and feel as if it were sculpted by artists.

You live in a mess for a few months, but all the while it's such a pleasure to watch Colan build. He does so with such care and with such a fine mind for detail and craftsmanship. Personally, Colan is smart, quite funny and very clever -- a joy to work with.
